

New Realtime Editing Suite for your video programs!

Communicating for Change

At CFC, editing is a joy...

You work with two streams of video plus an animated graphics layer and perform an impressive array of sophisticated effects – all in real-time – without rendering.

All that real-time editing power gives you the time to experiment. There's no penalty for changing your mind. Everything happens instantly at full on-line quality.

You get incredible speed and creative freedom without compromise!

Whether you're creating commercial spots for national television, news reports, documentaries, music videos, training material, corporate presentations, or product promos, our **new realtime video editing suite** is the right thing for you!

Communicating for Change is proud to offer discerning clients the latest **Matrox DigiSuite LX professional DV & MPEG2 Editing Platform**.

Our **Matrox DigiSuite LX** provides native DV and MPEG-2 editing under Windows 2000. Our editing platform offers the following features:

- Award-winning realtime feature set
- Native-DV and 50 Mbps MPEG-2 editing
- MPEG-2 output for DVD and CD authoring
- 1394, analog component, Y/C, and composite support built-in
- Optional SDI and AES/EBU add-on module
- Integrated web video creation tools
- Field-proven, reliable technology
- Powers Windows 2000 content creation applications from leading vendors
-

If you are primarily working with DV source material, or you regularly output in MPEG-2 for applications such as broadcast transmission or DVD authoring, then **Matrox DigiSuite LX** is an excellent solution for you.
